III ACTIONS TAKEN

On February 23, 2003 at approximately 3:40 am, EPA was notified of a spill of approximately 3,000 gallons of diesel from a derailed locomotive at a CSX rail yard in Louisville, Kentucky. Outposted OSC, Art Smith, was dispatched to the incident to access clean up activities and provide technical oversight support as needed.

All of the diesel was contained on site property. Diesel contaminated areas consisted of the ballast, drainage ditch, and the retention pond. Responsible party cleanup contractor activities include vacuum of all spill diesel and the excavation of all contaminated soil.

Other agencies at the scene include local EMA and State personnel.
